

AymanHQ – The Fold

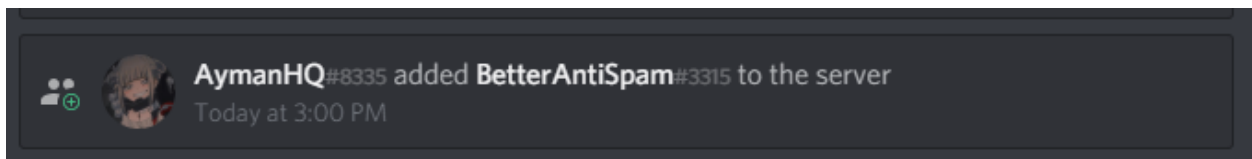

Document created by NeverLand.

Contains all the proof needed.

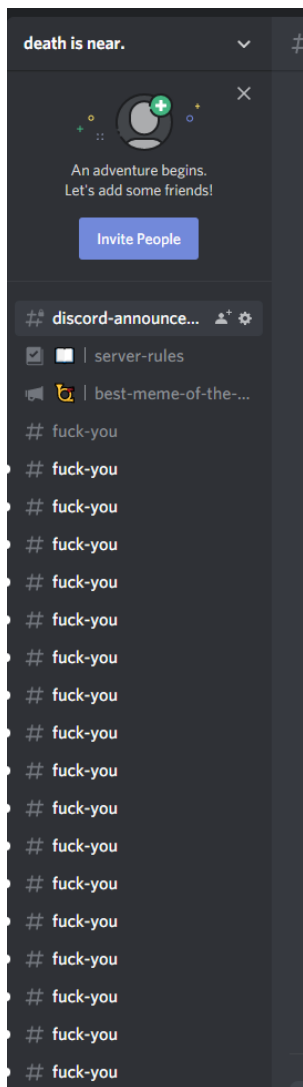

So, the fold starts when my Discord gets raided for the second time. So anyways, one of my friends which I do not want to leak his identity sent me this screenshot.

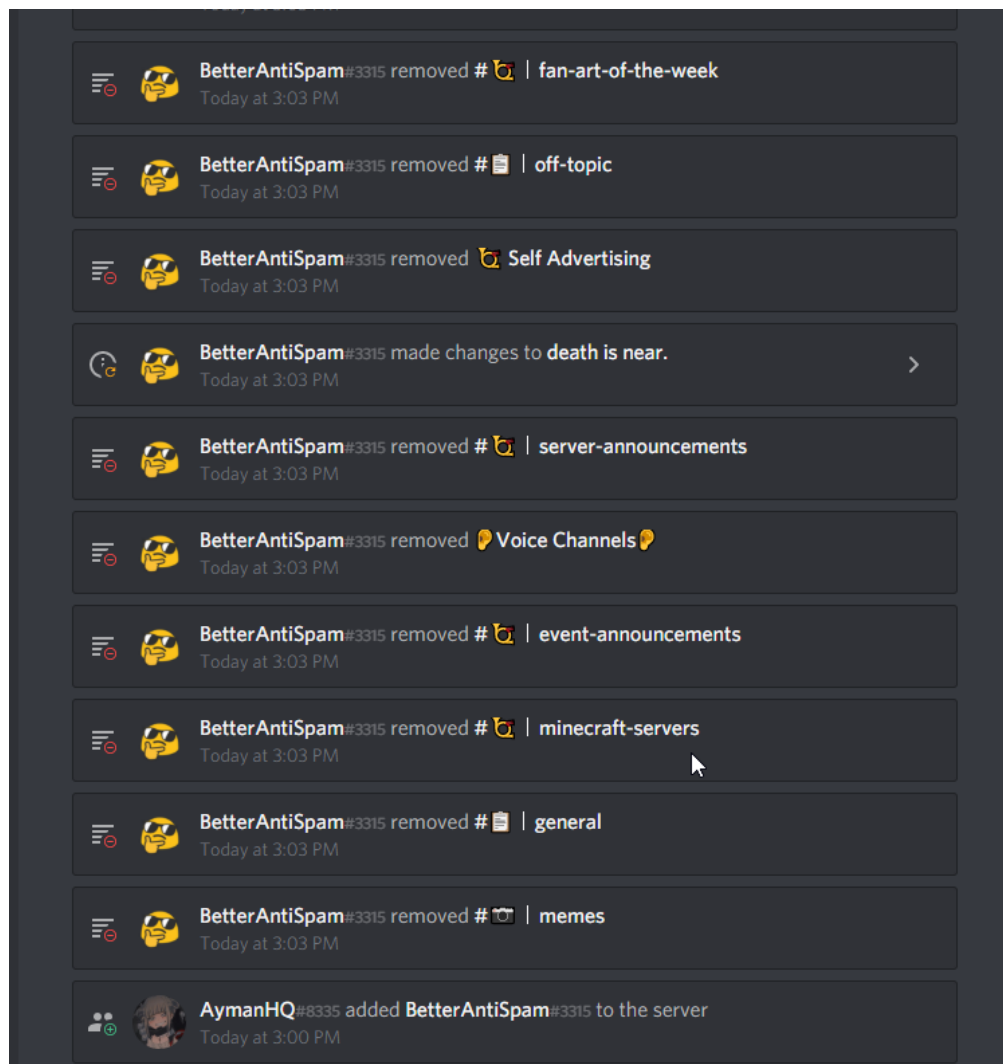

Even tho Ayman didn't do the raid, he invited Classii, another skid to do it for him. They added this bot (which guess what, will be reported to Discord soon),

They changed my Discord server name to "death is near." and the server logo aswell, not to anything inappropriate of course.

Here is the proof they wiped my channels.

After asking him what did he do, or politely saying it, telling him he fucked up because there is evidence of him doing that, this is what I got in response.

you have 10 seconds to give me a good reason not to block you

AymanHQ Today at 3:10 PM

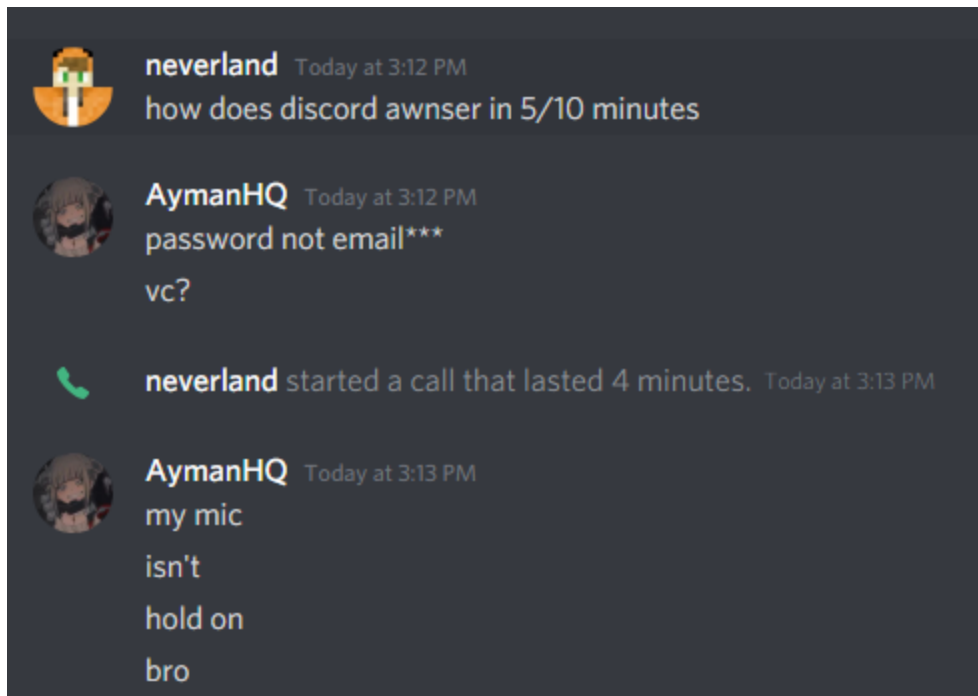

okay so I wanted to help you out and wanted to add betterantispam bot

i searched up and turns out it was the wrong one

then my account's email got changed that why i went offline for couple minutes

if u trust me u do

if u don't then I can't change your mind

Not leaking more DMS. Also, nice story change.

In that call, I'm going to do a transcript.

NeverLand: "so are you going to be a retard or no, are you going to tell me what happened"

Ayman: "so I went into a random website to add BetterAntiSpam and that was what I've done so I added that bot"

NeverLand: "so tell me, how can a Discord Application (the bot) have access to your discord email and password and the ability to change it"

Ayman: "it just does dude"

NeverLand: "so why did you change your story from changing the email, but when I said how did discord reply to your email fast, you said it's the password"

Ayman: "when I changed my password I was in the Arabic keyboard I fucked up at typing it so I forgot it"

I hang up. I'm thinking how the fuck does he forget what he typed, even tho hes Arabic and he could use the Arabic password.

Anyways that is his fold, and classii's as well.
