## Oh boy is this going to be a fun one to write.

Let's start off when I met him, or maybe not that far away ~~two years ago~~.

Let's start when he asked me for the voting plugin we used on a server (fallen.rip) I made with him like idk, months ago lol.

He asks me this:

I answer:

Since I've seen him skid before. I've asked him what a lambda is:

He folded so hard that he even started putting question marks LOLLLLL

Anyways a day later he msgs me this

Isn't this a good time to comment on his premade LOL

Number one, why not put skyblock instead of name
Number two, nice failed placeholder
Number three, invisible characters. Bro, you've used multiple of those for ur shitty
backdoored premades. How do you not have one that's working for your free shitty
premade

Alright alright alright, let's move on to the Shitty invadedlands premade "custom plugins" hang on mate, the only custom you have is a plugin that redirects you to an essentials command.

Anyways, shitty commercial video that I edited, which I no longer have because yes. This is the scoreboard for the hub that I managed to find

LOLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLLL I CAN'T

Anyways commenting on that commercial

Yeah shitty af, he didn't want his name on it because he was scared because he didn't want him to get blacklisted again from invaded because of his shitty 300$ rank, shouldn't have bought it then mate.

Really is there even a comment for this skid anymore lol

Also, he got his channel hacked because some kid hated him
